DIRECTOR GENERAL,
Agricultural Engineering Department
Balochistan, Quetta.

Observation	Decision/Remark
<p>In clause 2.1 of Section I (Instruction to Bidders/Tenders), companies registered with either SFCP or Registrar Joint Stock Companies are eligible. Whereas, in clause 8.1 (p) same section a certificate from SFCP is required to bid. You are requested to amend clause 8.1 to allow either SFCP certificate or certificate from Registrar Joint Stock Companies.</p> <p>1. In clauses 14.3 & 33.1 of Section I (Instruction to Bidders/Tenders), condition of bank Guarantee from an A+ bank only must be omitted as all public sector tender</p> <p>2. The most important thing that your tender requirement as per the Schedule of Technical Data is totally in contradiction to the guidelines of BPPRA, we would like to clarify as follows:</p> <p>1. As per the Clause C Country of Origin are USA, UK, EU and Japan, this cannot be limited because as per the following rule of BPPRA, Your specifications require engine model Komatsu, Caterpillar, New Holland (FIAT), John Deere and Case, this requirement is completely biased, as we have serious reservations because CNH (Case New Holland) is one manufacturer and they use FPT as their engine, so your reference to 2 of their brands is not justified. Furthermore, one of the biggest manufacturers of engine worldwide Cummins has been missed out, this is not understandable.</p>	<p>Corrigendum issued for registration Certificate either from SFCP or Registrar Joint Stock.</p> <p>Corrigendum issued for Bank Guarantee from schedule bank as mentioned in BPPRA Rules 2014. The Bank Guarantee will get verified from the Bank.</p> <p>The approval of competent authority has been obtained for prescribing the Country of Origin for bulldozers as USA, UK, EU and Japan.</p> <p>The approval of competent authority has been obtained for specification of engine model. The Case and New Holland merged in FIAT. The engine specification comprised of the world renowned engine manufacturers whose engines are used in Pakistan.</p>
<p>ii. Make of Undercarriage: Undercarriage is also limited to CAT, Komatsu, John Deere, as per our understanding these are not undercarriage manufacturers, while BERCO and ITM are.</p>	<p>As per factual position of BERCO and ITM are the manufacturer of undercarriage. Any firm can use BERCO and ITM undercarriage.</p>
